AGILITECH

AgiliTech offers a full suite of IT services to meet the mission-critical needs of the public and commercial sectors, and to solve complex, challenging problems for their clients.

Services We Provide

AgiliTech designs and delivers solutions that enable our government to efficiently and securely conduct their business. We apply over 20 years of experience to work directly with clients to solve their most difficult problems using our proven agile development and DevSecOps approaches.

Agile & DevSecOps Application Development

Agile development is a critical part of our culture to bring our clients features faster and to make changes as we go. We focus on understanding what the business needs and how the users want to work. This drives our design and development process to ensure that we maximize the business value for our users. We perform a range of full stack application development and support. Our developers have experience in a broad range of technologies including Java, .Net, cloud programming, Open Source, and others.

Data Management

We provide data management services and solutions to support mission-critical systems. We deliver innovative, cost-effective solutions that enable more efficient access and sharing of information across the enterprise, enabling system owners to make informed and data-driven decisions.

IT Modernization and Emerging Technologies

We upgrade our clients to modern, cloud native technologies by focusing on mission and business needs, and by applying emerging technologies such as artificial intelligence (AI), machine learning (ML), Blockchain, and Robotic Process Automation (RPA).

Cloud and Infrastructure Optimization

We operate and maintain large, complex, mission-critical systems from end-to-end. We use a variety of cloud platforms including Amazon Web Services (AWS), Azure, SharePoint Online, and Google Cloud Platform.

Biometrics and Identity Management

Our multi-modal biometric solutions improve the accuracy and speed of correct identification. We focus on person-centric solutions to make identity management more effective.

Cybersecurity

We provide a full range of cybersecurity services on-premises and in the cloud to deliver secured development, information assurance, and support for security review, System Security Plan (SSP), Plan of actions and milestones (POAM), and Authority to Operate (ATO).

Who We Are

AgiliTech, LLC is a Joint Venture between TTW Solutions, Inc. and Dev Technology Group, Inc. By joining forces, AgiliTech combines both companies' proven core competencies and resources to deliver innovative, high-quality IT services and solutions. AgiliTech offers a full suite of IT services to meet the mission-critical needs of our clients. We work to solve the complex, challenging problems of the public and commercial sectors. TTW Solutions and Dev Technology formed AgiliTech under the approval of the U.S. Small Business Administration (SBA) All-Small Mentor-Protégé Program (ASMPP); TTW Solutions, Inc., an 8(a) and Economically Disadvantaged Woman-Owned Small Business (EDWOSB), as the managing partner and Dev Technology Group, Inc. as our SBA-approved mentor. TTW Solutions is a woman-owned, minority-owned SBA certified 8(a) and EDWOSB that delivers first-rate, expert IT and management solutions and services to a variety of federal clients. TTW Solutions' goal is to maximize their customers business value and efficiency by using the most innovative and effective methods available. TTTW Solutions specializes in Agile & DevSecOps Application Development, Data Management, Cloud Solutions, Cybersecurity, Biometric Services, IT Modernization, and Emerging Technologies. Founded in 1998, Dev Technology Group delivers IT services and solutions that enable government missions. Our work supports multiple agencies including the Departments of Homeland Security, State, Army National Guard and others. Dev Technology specializes in full stack application development, biometrics and identity management, cloud and infrastructure optimization, IT and legacy modernization, and data management.
